

## SHORT BIO

**Eric Pop** is the Pease-Ye Professor of Electrical Engineering and, by courtesy, of Applied Physics and Materials Science & Engineering at Stanford and SLAC, where he also co-leads the SystemX Alliance. He received his PhD from Stanford and earlier degrees from MIT. His research interests include nanoelectronics, data storage, and energy. Before Stanford, he spent several years on the faculty of UIUC, and in industry at Intel and IBM. He is an APS and IEEE Fellow, a Clarivate Highly Cited Researcher, a recipient of the Intel Outstanding Researcher Award and of the Presidential Early-Career Award. In his spare time he enjoys snowboarding and tennis, and in a past life he was a college radio DJ at KZSU 90.1. More information about the Pop Lab is available online at <https://poplab.stanford.edu> and at [@eric-pop](#).
